

Javier Abad Martínez

PhD Student in Machine Learning, ETH AI Center

javier.abadmartinez@ai.ethz.ch jaabmar.github.io Google Scholar GitHub LinkedIn

RESEARCH INTERESTS

Language model safety and alignment; privacy-preserving machine learning; causal inference.

EDUCATION

ETH Zurich

Dec. 2022 – Jul. 2026

PhD in Machine Learning; advised by Prof. Fanny Yang

Zurich, Switzerland

ETH AI Center Doctoral Fellow; visiting researcher, Simons Institute (UC Berkeley), Fall 2024; member, GPAI Code of Practice expert group.

University of Cambridge

Oct. 2020 – Aug. 2021

MPhil in Machine Learning and Machine Intelligence; Distinction

Cambridge, UK

Universidad Politécnica de Valencia

Sep. 2015 – Jul. 2020

BSc in Telecommunications Engineering; BSc in Business Administration

Valencia, Spain

GPA: Telecommunications 96%; Business 95%; Georgia Tech exchange 4.0/4.0.

RESEARCH EXPERIENCE

Google DeepMind

Oct. 2025 – Dec. 2025

PhD Student Researcher, Gemma Post-training Team

Zurich, Switzerland

Apple

Mar. 2025 – Oct. 2025

Machine Learning Researcher, Visual Generation & AI Safety

Cupertino, CA / Zurich

Featurespace

Mar. 2022 – Nov. 2022

Research Scientist

London, UK

University of Cambridge

Oct. 2021 – Feb. 2022

Research Assistant, Machine Learning Group (CBL) with Adrian Weller MBE

Cambridge, UK

University of Cambridge

Apr. 2021 – Aug. 2021

Research Assistant, Van der Schaar Lab with Prof. Mihaela van der Schaar

Cambridge, UK

Universidad Politécnica de Valencia

Nov. 2019 – Jul. 2020

Research Assistant, Computer Vision & Behavior Analysis Lab

Valencia, Spain

SELECTED PUBLICATIONS

Efficient Randomized Experiments Using Foundation Models

NeurIPS 2025

Copyright-Protected Language Generation via Adaptive Model Fusion

ICLR 2025, Oral

Privacy-Preserving Data Release via Optimal Transport and Particle Gradient Descent

ICML 2024

Detecting Critical Treatment Effect Bias in Small Subgroups

UAI 2024

Hidden Yet Quantifiable: Lower Bounds for Confounding Strength

AISTATS 2024

Approximating Full Conformal Prediction at Scale via Influence Functions

AAAI 2023, Oral

SELECTED TALKS

Google DeepMind

Inference-time compute for student–teacher distillation

Zurich, 2025

Apple

Pre-training visual generation models

Zurich, 2025

ICLR 2025

Adaptive model fusion for copyright protection

Singapore, 2025

Hasler Foundation

Reliable inference from observational data

Bern, 2024

ETH AI Center

Lower bounds for hidden confounding strength

Zurich, 2024

AAAI 2023

Scaling conformal prediction with influence functions

Washington, DC, 2023

SELECTED AWARDS

Excellence Fellowship in the Valencian Community

2023

Best Engineering Graduate, Capitanía General de Valencia

2022

ETH AI Center Doctoral Fellowship

2022

“La Caixa” Excellence Fellowship (declined)

2021

Best Graduate, Telecommunications Engineering and Business Administration (separate awards)

2021

First place, Spanish national ranking of Telecommunications Engineering students

2021

SKILLS AND LANGUAGES

Technical: Python, PyTorch, JAX, TensorFlow, Triton, MATLAB.

Languages: Spanish and Catalan (native); English (fluent, C2); German (B1).
