

# Javier Abad Martínez

PhD Student in Machine Learning, ETH AI Center

javier.abadmartinez@ai.ethz.ch   jaabmar.github.io   Google Scholar   GitHub   LinkedIn

## RESEARCH INTERESTS

Language model safety and alignment; privacy-preserving machine learning; causal inference.

## EDUCATION

### ETH Zurich

*PhD in Machine Learning; advised by Prof. Fanny Yang*

Dec. 2022 – Jul. 2026

*Zurich, Switzerland*

ETH AI Center Doctoral Fellow; Simons Institute visitor (UC Berkeley), Fall 2024; GPAI Code of Practice expert group member.

### University of Cambridge

*MPhil in Machine Learning and Machine Intelligence; awarded with Distinction*

Oct. 2020 – Aug. 2021

*Cambridge, UK*

### Universidad Politécnica de Valencia

*BSc in Telecommunications Engineering; BSc in Business Administration*

Sep. 2015 – Jul. 2020

*Valencia, Spain*

## RESEARCH EXPERIENCE

### Google DeepMind

*PhD Student Researcher, Gemma Post-training Team*

Oct. 2025 – Dec. 2025

*Zurich, Switzerland*

### Apple

*Machine Learning Researcher, Visual Generation & AI Safety*

Mar. 2025 – Oct. 2025

*Cupertino, CA / Zurich*

### Featurespace

*Research Scientist*

Mar. 2022 – Nov. 2022

*London, UK*

### University of Cambridge

*Research Assistant, Machine Learning Group (CBL) with Adrian Weller MBE*

Oct. 2021 – Feb. 2022

*Cambridge, UK*

### University of Cambridge

*Research Assistant, Van der Schaar Lab with Prof. Mihaela van der Schaar*

Apr. 2021 – Aug. 2021

*Cambridge, UK*

### Universidad Politécnica de Valencia

*Research Assistant, Computer Vision & Behavior Analysis Lab*

Nov. 2019 – Jul. 2020

*Valencia, Spain*

## SELECTED PUBLICATIONS

Efficient Randomized Experiments Using Foundation Models

*NeurIPS 2025*

Copyright-Protected Language Generation via Adaptive Model Fusion

*ICLR 2025, Oral*

Privacy-Preserving Data Release via Optimal Transport and Particle Gradient Descent

*ICML 2024*

Detecting Critical Treatment Effect Bias in Small Subgroups

*UAI 2024*

Hidden Yet Quantifiable: Lower Bounds for Confounding Strength

*AISTATS 2024*

Approximating Full Conformal Prediction at Scale via Influence Functions

*AAAI 2023, Oral*

## SELECTED TALKS

### Google DeepMind

Inference-time compute for student–teacher distillation

*Zurich, 2025*

### Apple

Pre-training visual generation models

*Zurich, 2025*

### ICLR 2025

Adaptive model fusion for copyright protection

*Singapore, 2025*

### Hasler Foundation

Reliable inference from observational data

*Bern, 2024*

### ETH AI Center

Lower bounds for hidden confounding strength

*Zurich, 2024*

### AAAI 2023

Scaling conformal prediction with influence functions

*Washington, DC, 2023*

## AWARDS AND FELLOWSHIPS

Excellence Fellowship in the Valencian Community

2023

Best Engineering Graduate, Capitanía General de Valencia

2022

ETH AI Center Doctoral Fellowship

2022

“La Caixa” Excellence Fellowship (declined)

2021

Best Graduate, Telecommunications Engineering and Business Administration (separate awards)

2021

First place, Spanish national ranking of Telecommunications Engineering students

2021

## SKILLS AND LANGUAGES

**Technical:** Python, PyTorch, JAX, TensorFlow, Triton, MATLAB.

**Languages:** Spanish and Catalan (native); English (fluent, C2); German (B1).
